

BEWUSST BECHERN! "CONSCIOUSLY DRINKING"

Reusable plastic-beakers instead of one-way-beakers

The reusable plastic-beaker is applied instead of one-way-beakers during events, where glasses cannot be used (e.g. sports field, Disco).

The reusable plastic-beaker is handed out in return for refund of 1,-- €. Thereby a return rate up to 100% is achieved and no expenses for collection and disposal of one-way-beakers come into existence.

Offer for the organiser:

The reusable plastic-beaker is available at regional outposts all over Styria under the following conditions.

reusable plastic-beaker (size 0,5 litre and 0,25 litre with imprint)	
purchase (incl. 20% VAT)Euro 0,264 per beaker
washing fee (incl. 10% VAT)Euro 0,055 per beaker
rental- and washing fee (incl. 10% VAT)Euro 0,060 per beaker

These costs per beaker are applied to each full transport-box (264 pieces 0,50 litre beaker and 368 pieces 0,25 litre beaker).

This offer applies to each public and private organiser acting on the following criterions:

- Separation and disposal of waste goes on just like in households as regulated by law.
- For meals and drinks only metallic cutlery, porcelain tableware and glasses are used generally.
- Where glasses are not allowed to be used, the reusable plastic-beaker is handed out in return for refund of 1,-- €.
- Products packed in small portions are not used (sugar, ketchup, milk....).

How does it sound?
Better than a one-way-beaker?
And the dishes?

**GLASS and CERAMIC sound like
LIFESTYLE... and first of all like
ENVIRONMENTAL AWARENESS.**

Initiative of Styrian Regional Government -
Department 19D Waste Management Et Resource Efficiency

Faultless hygienic storage and proper transport is guaranteed by use of the transport box. Charges for the box are included in the beaker's price.

"CONSCIOUSLY DRINKING"

Are one-way-beakers widespread over the ground beautiful?

The alternative says: reusable = excess value

WASHABLE BEAKERS are standing for
LESS WASTE... and first of all for
CLEAN FESTIVALS.
